

Summary

Full Stack Developer specializing in **React, TypeScript, Node.js, NestJS, and PostgreSQL**. Experienced in building **scalable web applications, secure REST APIs, and responsive user interfaces**. Skilled in **JWT authentication, role-based authorization, Redis, Docker, and database design**. Experienced in **Three.js** and 3D web development for creating interactive and immersive experiences, along with **Redis, Docker, TypeORM, Tanstack, Redux, and Tailwind CSS**. Strong focus on clean architecture, performance optimization, scalability, and maintainable code.

Technical Skills

Frontend: React.js, Styled Components, CSS, HTML, TS, JS, Tailwind, Redux, Tanstack, Three.js, React Three Fiber

Backend & Databases: Node.js, NestJS, Express, TypeORM, MongoDB, PostgreSQL, REST API, MySQL, Firebase, Redis

Others: Docker, Postman, Swagger, JWT, RBAC, API Integration, Framer Motion, GitHub, System Design, Agile, Git

Core Competencies: API Integration, Database Design, Security Best Practices, Performance Optimization

Experience

Graduation Project | *Frontend Developer*

Sep 2025 – Jun 2026

- Implemented **JWT-based authentication and role-based access control across 4 user roles**, supporting secure access to clinic workflows.
- Developed interfaces for **appointment scheduling, queue management, payment management, and dashboards**.
- Developed **20+ reusable and scalable UI components** using React, TypeScript, and Styled Components.
- Integrated **AI-based dental X-ray analysis** for detecting multiple dental conditions.
- Optimized responsive components for **cross-browser compatibility and consistent user experience** across modern browsers

Benha University | *Software Engineer intern*

Oct 2024 – Nov 2024

- Supported **5+ departmental tasks and day-to-day activities**, gaining practical exposure to software engineering workflows, organizational processes, and professional development practices.
- Collaborated with peers, leadership, and customers, demonstrating strong communication and teamwork skills.

ALX Africa Training | *Frontend Developer*

Jan 2023 – Mar 2023

- Completed an intensive **36+ hours/week** software development program covering **C, Bash, Linux, Git, and command-line development**.
- Applied **JavaScript and frontend development concepts** through practical coding exercises, strengthening problem-solving.

Projects

Employee Management System (EMS) | *React, TypeScript, NestJS, PostgreSQL, TypeORM, Redis, Docker*

GitHub: github.com/MohamedAmer29/Employee-Management-System-FrontEnd

- Developed a full-stack Employee Management System supporting **3 user roles** and **20+ core administrative features** using React, NestJS, PostgreSQL, Redis, and Docker.
- Implemented **JWT authentication, role-based authorization across 3 user roles, 140+ RESTful APIs, automated attendance processing, dashboard analytics, notifications, and audit logging**, with PostgreSQL for data management and Redis for caching.

Portfolio | *React, TypeScript, Tailwind CSS, Three Fiber, NestJS, PostgreSQL, TypeORM, Redis, Docker*

GitHub: github.com/MohamedAmer29/Portfolio-Frontend

- A modern **full-stack developer portfolio** designed to showcase **3+ projects**, technical skills, experience, and services through an interactive and engaging user experience.
- Built with **React, TypeScript, and Tailwind CSS**, with **Three.js and React Three Fiber** used to create interactive 3D elements and immersive visual experiences.
- The backend is powered by **NestJS and PostgreSQL**, with **Redis** for caching and performance optimization.

E-Commerce Application | *MongoDB, Express.js, React, Node.js, TypeScript*

GitHub: github.com/MohamedAmer29/Ecommerce-App

- A full-stack e-commerce application built using the **MERN stack**, providing a complete online shopping experience for customers and an intuitive management interface for administrators.
- Implemented features including **user authentication, product management, product search and filtering, shopping cart, checkout, order management, and role-based access control**, with RESTful APIs connecting the frontend and backend.

Chit Chat Application | *React, TypeScript, Firebase, Tailwind CSS*

GitHub: github.com/MohamedAmer29/Chit-Chat

- A real-time chat application built with **React and Firebase**, enabling users to communicate through instant messaging.
- Implemented **user authentication, real-time messaging, online user presence, chat management, and message synchronization** using Firebase services, with a responsive UI designed using Tailwind CSS.

Education

Benha University

Faculty of Computer Science and AI | CS Department | GPA:3.6/4

Qalyubia, Egypt

2022 – 2026
